

Why are art and creativity important?

1. God is the original Creator:

Being creative can help us feel closer to God as we connect with a part of God's image in us.

Being creative is a gift we can easily lose early in life, let's keep exercising it and keep it alive.

2. We need to be creative to communicate the good news well to people who haven't heard it:

Creative events and activities can be good spaces to invite people to come along and join in.

Practising creativity can help us get better at imagining new possibilities and new ways of communicating.

3. We all meet with God in different ways:

Bringing creative and visual ideas into our worship can offer new ways for people to join in and feel a part.

Art and culture can be exciting and engaging ways to help people think about God and life.
